

Wireless Conferencing BYOM

Seamless Camera & Microphone Sharing

Experience true Bring Your Own Meeting (BYOM) flexibility with our Type-C/USB 2-in-1 transmitter. Wireless stream room audio and video feeds back to your laptop. Fully compatible with leading video conferencing platforms including Microsoft Teams, Zoom, and Tencent Meeting.

9-Screen Split Display 1080p Point-to-Point

Supports simultaneous wireless and wired projection for up to 9 separate user terminals. Delivering pixel-perfect, point-to-point 1080p resolution per split, it seamlessly integrates mixed-mode connectivity for high-density corporate collaboration and command-center environments.

App-Free Hybrid Wireless Projection

Eliminate the need for third-party software installation. This system natively supports Miracast and Apple AirPlay, allowing users to effortlessly mirror their Android and iOS screens using their device's built-in wireless casting features.
